MultiMedia: On hyperstructure and musical structure

100%

David C. De Roure, Don G. Cruickshank, Danius T. Michaelides, Kevin R. Page , Mark J. Weal

Proceedings of the thirteenth conference on Hypertext and hypermedia June 2002

In this paper we report on an ongoing investigation into the relationship between musical structure and hyperstructure, based on a series of open hypermedia systems research projects that have featured case studies involving musical content. We provide a general overview of the intersection between hypermedia and musical structure, drawing also on ideas from narrative structure. Through the example systems we consider techniques for building hyperstructure from musical structure and, conversely, ...

Link Analysis: Topic-sensitive PageRank

100%

বী Taher H. Haveliwala

Proceedings of the eleventh international conference on World Wide Web May 2002

In the original PageRank algorithm for improving the ranking of search-query results, a single PageRank vector is computed, using the link structure of the Web, to capture the relative "importance" of Web pages, independent of any particular search query. To yield more accurate search results, we propose computing a set of PageRank vectors, biased using a set of representative topics, to capture more accurately the notion of importance with respect to a particular topic. By using these (p ...

3 An architecture for secure wide-area service discovery

100%

🗹 Todd D. Hodes, Steven E. Czerwinski, Ben Y. Zhao, Anthony D. Joseph, Randy H. Katz

Wireless Networks March 2002

Volume 8 Issue 2/3

The widespread deployment of inexpensive communications technology, computational resources in the networking infrastructure, and network-enabled end devices poses an interesting problem for end users: how to locate a particular network service or device out of hundreds of thousands of accessible services and devices. This paper presents the architecture and implementation of a secure wide-area Service Discovery Service (SDS). Service providers use the SDS to advertise descriptions of available ...
